17 July 1980

MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson
Director of Data Processing

SUBJECT: ODP Report for Week Ending 16 July 1980 (U)

Support to PTO (U)

CAMS - COMIREX Automated Management System. CAMS2 Project. The DASITT (DCI's ADP&T Support to Imagery Task Team) Report is being reviewed for ODP and DDA comments. In summary, the report's recommendations have two impacts upon CAMS--support for U.S. commands world-wide, and an interactive tasking capability. The first impact will require additional computing power to support new users, new/modified software, and a communications link between CAMS and COINS or AUTODIN. The second impact will require additional computing power to support reactive tasking on a pass-by-pass basis, and new/modified software. A formal reply to the report is being prepared by A Division management. (S) [REDACTED]

Major ODP Support Projects (U)

A preliminary review of the 1980 revised requirements for the following major projects indicate approval will be required by the Comptroller for ODP to provide the requested support:
